Blood sample collection & Procedure. Before starting, acquire needles and sealable zip bags.

1. Secure the parrot, clean the puncture site (toe pad) and make a gentle puncture. A fresh needle must always be used for each individual's blood sample!
2. Apply 2-3 drops of blood onto the sampling card. Apply the blood to the marked field "**Blood Sample**".
3. On the sampling card and also in the table on the application form, enter the ring number and the species of the individual from which the sample was taken. Do not fill in the Lab Code.
4. Immediately after collection, allow the sampling card to dry thoroughly in a bird-free environment (to prevent contamination). Then place it into a separate bag.
5. Fill the request form clearly, then place the form and samples into a mailing envelope and send by registered mail to: **BILGEN s.r.o., Pod Zahrádkami 321, 687 06 Velehrad, Czech Republic.**
6. After sample receipt, you will be sent an email confirmation of receipt and an invoice payment.
7. **Certificates with results are sent to email within 7 working days of sample receipt and payment.**

By signing this application form, you consent to the processing of personal data and DNA analysis of submitted samples for sex determination.

Sample collection date: **Signature:**

SAMPLING CARDS – *self-printed*

Cut out the sampling cards along the dashed lines to obtain 12 separate sampling cards. All instructions, "**Blood sample collection & Procedure**", are on the application form.
